

# BData™

## Bunker Logistics' Technology and Services Help You Manage Your Data

Bunker Logistics specialized data management allows us to transform your raw data into useful reports for measuring and managing your bunker purchases. We can quickly assist you in answering many questions regarding your bunker purchases including:

- How much HSFO/LSFO and MDO lifted by port and what was the average price per metric ton.
- What percentage of your total fuel purchases were lifted in each port/region over various time periods.
- How did your purchase prices compare to market indicators on the date of stem and the delivery date.
- What was the fuel diet and variances to purchased spec on and specific vessel.
- Who where last year's top ten ranked fuel suppliers.

### How Does BData Help?

BData is a complete service for collecting, validating, cleansing and consolidating all of your transactional data.

Flexibility, understanding customer needs and superior, cost effective service are at the core of our approach to everything we do. BData customers trust the responsiveness, reliability and expertise we bring to every project and have learned that partnering with Bunker Logistics always returns significant top and bottom line benefits to them.

Providing our clients with timely, secure, reasonable and cost effective method for gathering the information they need in a format that they can easily use is a key goal of BData services. We always welcome the opportunity to customize our offerings to your unique needs.

### Formats and Processing

BData can accept and provide data in a variety of formats on a variety of media. We can provide our clients with an excel-based template or clients can provide their own data in various formats (handwritten, printed, or electronically produced documents in Excel, ASCII, or other formats). We accept files transmitted via e-mail, floppy disks, CD-ROM or other media, as dictated by the client's specifications.

Automatic validation is also incorporated to verify standard formats such as date, time, special codes and fields.

### Analysis

Our senior consultants have extensive expertise in shipping and bunker procurement. By understanding the business and the application, they bring an extra level of validation to the process and value to the client by offering audit analysis.

### Reporting

Core reports, along with customized output reports, are developed and produced according to contract agreements. Some of our featured core reports are:

#### Transactional Summaries

These reports help group your transactions by grade, vessel/service, port, supplier, operator and/or broker

#### Pricing Performance

These reports evaluate fuel purchase price as compared to market indicators, company targets and market timing.

#### Fuel Diet Monitoring

Analysis of fuel test data to show average values and variances to spec.

#### Market Price and Supply Alert Data

These reports can be generated daily to the client's defined users.
